

Leader in Data Versioning and Pipelines for MLOps

Company

Pachyderm is the leader in data versioning and pipelines for MLOps. We provide the data foundation that allows data science teams to automate and scale their machine learning lifecycle while guaranteeing reproducibility. With over \$40 million in three rounds of funding from leading investors like Benchmark, Microsoft M12, Y Combinator, and others, Pachyderm, Inc. offers a commercial Pachyderm Enterprise Edition and an open source Pachyderm Community Edition. Pachyderm helps customers get their ML and AI projects to market faster, lower data processing and storage costs, and supports strict data governance requirements.

Products

Pachyderm is for data science teams who want to operationalize the data tasks in their ML lifecycle to iterate on data more quickly and reliably. Pachyderm is the leader in data versioning and pipelines for MLOps, and this data foundation allows data science teams to automate and scale their machine learning lifecycle while guaranteeing reproducibility. Unlike other data versioning and pipeline products Pachyderm provides data-driven automation, petabyte scalability and end-to-end reproducibility.

Pachyderm Enterprise Edition

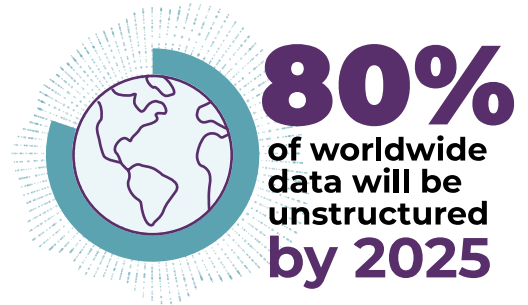

Pachyderm Enterprise Edition is our commercial offering designed for the largest projects in highly secure environments. Along with world-class support, your team also gets access to our full range of premium features including Pachyderm Console, authentication and access controls (RBAC), no scaling limits, JupyterHub integration, and centralized multiple cluster management.

Pachyderm Community Edition

Pachyderm Community Edition is our open source version of Pachyderm. With Pachyderm Community Edition, you get the core Data Versioning and Pipeline features of Pachyderm that you can deploy locally or in the cloud of your choosing. If you need help, there's an entire community of experts ready to offer their assistance.

“We're excited to witness the acceleration of Pachyderm's enterprise adoption as data versioning becomes an imperative for organizations of all sizes.”

— MICROSOFT

Milestones

2022 • Pachyderm Enterprise 2.0 is released; raises an additional \$12 million in funding

2020 • Pachyderm secures \$16 million Series B funding with Microsoft's M12 venture team

2018 • Pachyderm raises \$10 million Series A funding

2016 • Pachyderm Enterprise 1.0 is released

2014 • Pachyderm founded and raises seed round funding
